Subject: **AI Base Smart Energy Saving Device Report (71.05% electricity saved)**

Respected Sir,

I am **Devendra Umesh Chavan**, the founder of **Saavo Avinya Pvt. Ltd.**, a DPIIT-recognized startup under **Startup India** (DPIIT No. **DIPP170870**).
Our company is focused on developing **AI-powered Smart Energy Saving Devices**, specially designed for **Indian Railways** to optimize energy consumption and reduce electricity wastage.

We have previously **successfully demonstrated** our **AI-based Smart Fan Energy Saving Device** at the following railway stations: ***Mumbai Central, Bandra*** *and* ***Andheri Railway Station***

These pilot runs showed significant energy savings and validated the device's effectiveness in real-world railway environments.

Recently, we conducted another successful demonstration by installing the device on a single 60W ceiling **fan** At **Ram Mandir Railway Station, Platform No. 2**,

From **07 June 2025 to 06 July 2025**.

The device is programmed to automatically ***switch off the fan when not in use***, thereby minimizing unnecessary **energy consumption** and effectively **save electricity**.

Verified.

Scanned with OKEN Scanner

Final Report for total power consumption and saving for a single fan for 30 days

	A. Fan **without** AI Base Smart Energy Saving Device	B. Fan **with** AI Base Smart Energy Saving Device	**Total Energy SAVED 9 (A-B)**
UNIT	34.2	9.9	24.3
Cost (Unit rate 11rs)	34.2 X 11 = 376.2 Rs	9.9 X 11 = 108.9 Rs	376.2-108.9 = **267.3 Rs**

Total cost saved = 267.3 Rs in 1 month for a single fan i.e. **(71.05 % energy saved)**

Note: - At Ram Mandir station total fan at Platform = 77
Yearly saving at Ram Mandir station will be = 77 X 267.3 X 12 = 246985.2 Rs.

Cost of Single device with supply and installation (In Rs.) = 2700/-

Total Device cost for 77 Fan at Ram Mandir station = 207900/-

 # Return on Investment (ROI) = 10 Month
